

# Digital Notification Board for a Seminar Room

## OBJECTIVES

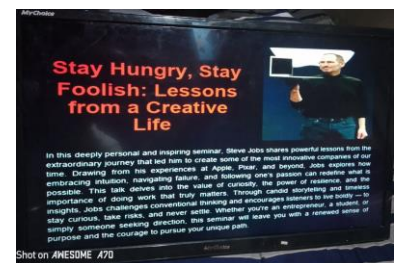

- Automating seminar schedule display
- Real-time seminar room status
- Eliminating need for manual updates or printed notices
- Building a low-cost, scalable, and energy-efficient system
- Providing accessible, on-site visual updates for all users

## KEY FEATURES

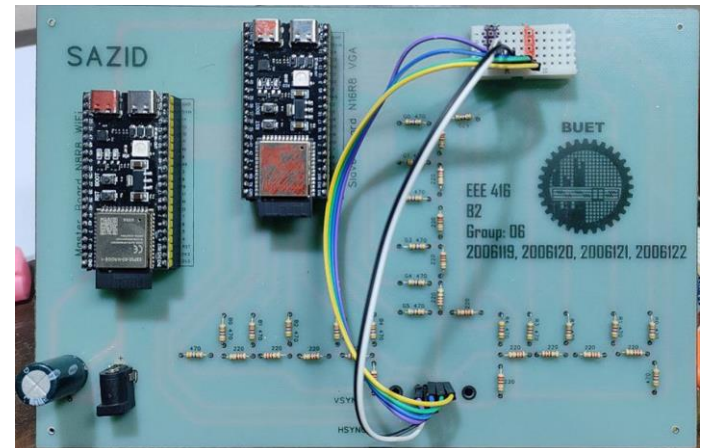

- Real-time schedule display
- Cloud-based automation
- VGA screen output
- Automated state detection
- Custom PCB design
- Cost-effective solution
- Minimal human interaction
- CDN delay handling
- Secure Google Form input
- Scalable for institutions
